## Work Experience

### Atlantis World (React.js, Express.js, MongoDB, Phaser.js, WebRTC)

Remote

Full stack developer

Nov 2021- Feb. 2023

- Designed and developed with a game HUD and website, providing an immersive experience for users.
- Developed an administrative interface to organize and manage user data more efficiently.
- Designed and developed internal work tools to streamline and optimize content creation.

### Treeverse (Express.js, SQL, Phaser.js, Websockets)

Remote

Full stack developer

Aug. 2021- Nov. 2021

- Developed social features such as player housing and character creation, allowing players to customize their gaming experience.
- Halved loading times by introducing support for a more efficient file type.

### EZLGG.

Remote

FRONTEND DEVELOPER INTERN

July. 2021- September. 2021

- Designed and implemented a user interface and systems for team bracketing and score storage.
- Translated designs and wireframes into a highly responsive user interface and reusable components using React.js.
- Connected Back-End APIs to display data in React.js using react-ridge-state.

## Projects

### Notes To No One

Next.js, Node.js, Redux

Collection of blog posts.

Github

- Developed a single-page application using Next.js, Node.js, and Markdown files to share development blogs.
- Utilized static site generation has resulted in faster loading times and increased efficiency.
- Firestore was utilized for user authentication and the storage of user data.
- <https://blog-g4r0s1j1n-kingcosmic.vercel.app/>

### Restaurant Landing Page

React.js, Firebase

UX/UI Design

Github

- I developed a responsive business landing page using React.js and CSS.
- Designed to provide an optimal user experience regardless of the device or platform.
